

SOUTHWEST  
AERIAL SURVEYS

Drone Data  
Solution for  
**Promotional  
Video and  
Images**

**Perfect results for your requirements.**

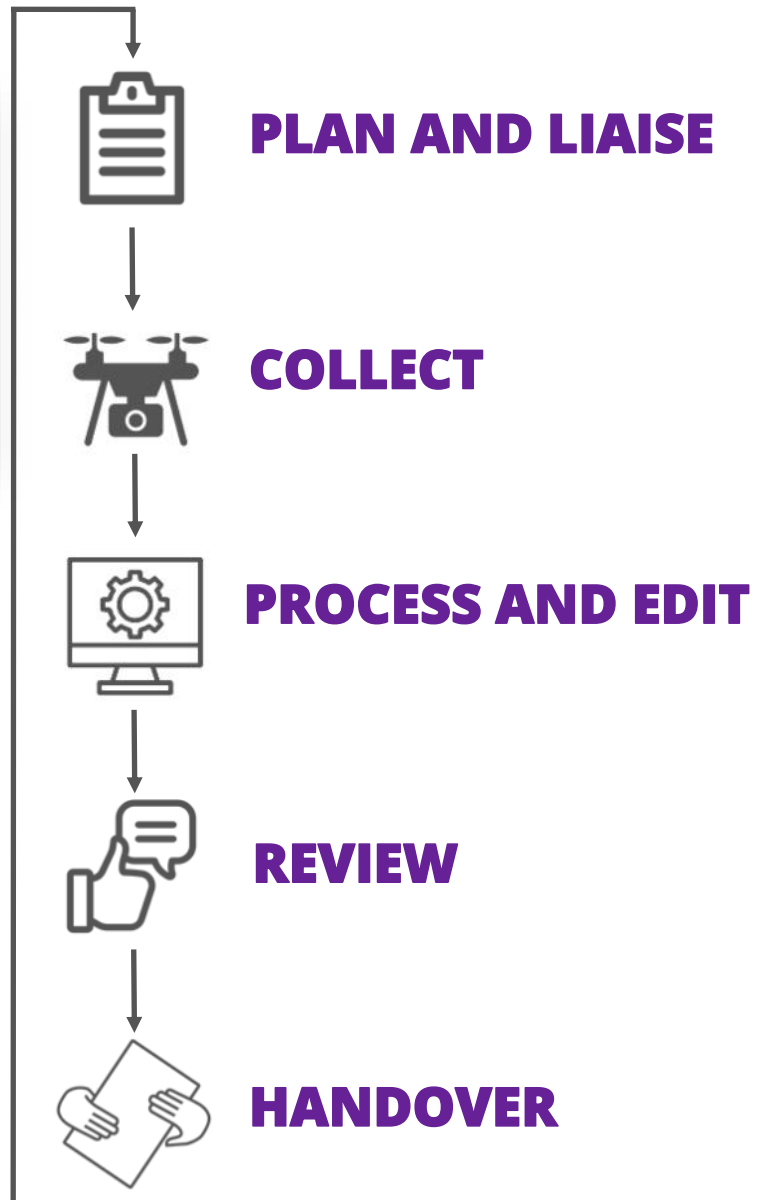

## Introduction

Drone videos offer a fresh, unique way for you to tell your story. Aerial imagery can provide new perspectives on products, projects, events, and your own business premises – whatever you have in mind, filming with a drone is a great way to create a memorable visual experience!

South West Aerial Surveys offers a streamlined workflow solution for your projects. Our fully qualified and insured commercial drone pilots will provide very high-quality drone footage, or aerial photography, which we can also edit for a real cinematic result. Drone films make great website headers, and they're also very popular on social media.

**High quality videography and stills create fresh perspectives for your project.**

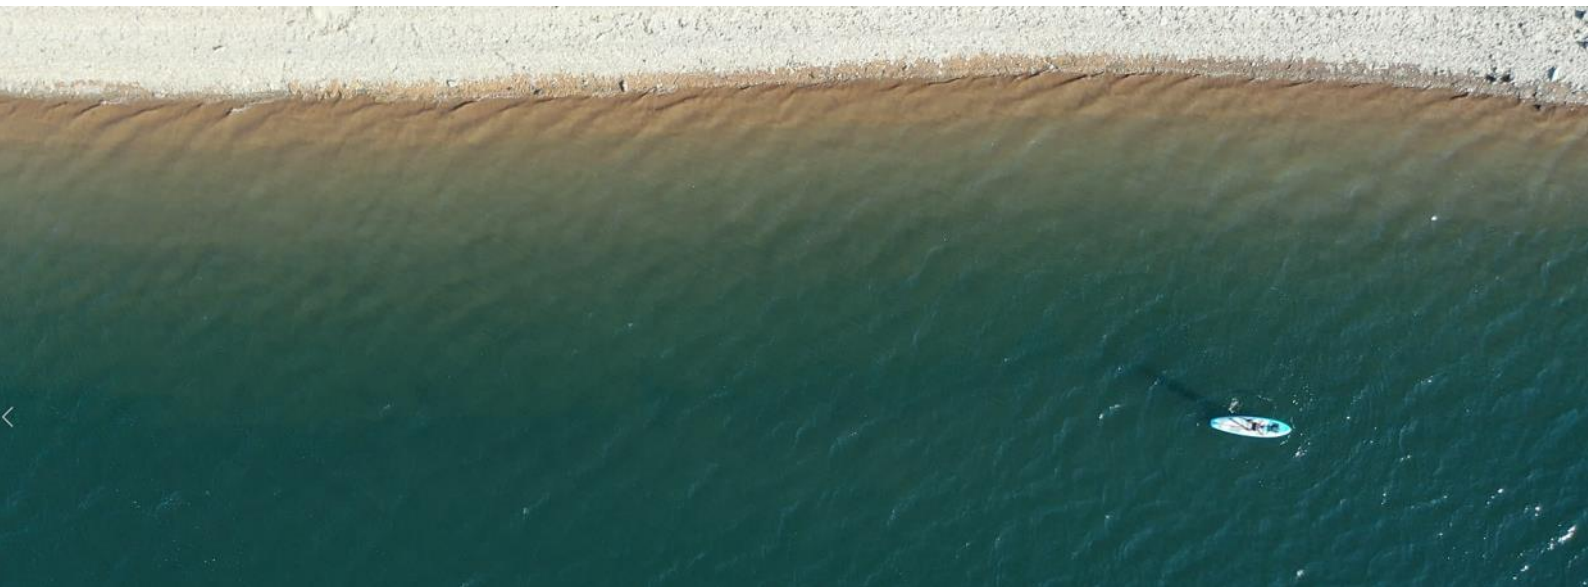

## Drone Data Solution

The advancement of drones has revolutionised the production of aerial imagery. We use the latest drone technology allowing us to capture images from near roof-line to 120m altitude. Images can be JPEG, raw-captured and even time-lapse.

Drones offer high-image quality. They can shoot in 4k resolution as well as slow-motion 4k, giving outstanding, professional-looking results.

Aerial footage will give your business a unique view, the 'wow' factor and help clients get a better view of your products and services.

## Promotional Videos and Images for a Variety of Sectors
